

Texas Livestock Project Participation and Financial Support

Texas enjoys the largest youth livestock program in the nation and is also unmatched in livestock project participation and support from donors. The Texas Livestock Project Participation and Financial Support Survey was sent out to county extension agents statewide to report the total youth participation (4-H and FFA combined) in livestock shows at the county level, along with the economic support to livestock project exhibitors. The heat map below shows the dispersion of Market and Breeding Poultry in Texas. The data collected is a combined estimate from the 2015 county-level livestock shows in Texas.
