

Texas Livestock Project Participation and Financial Support

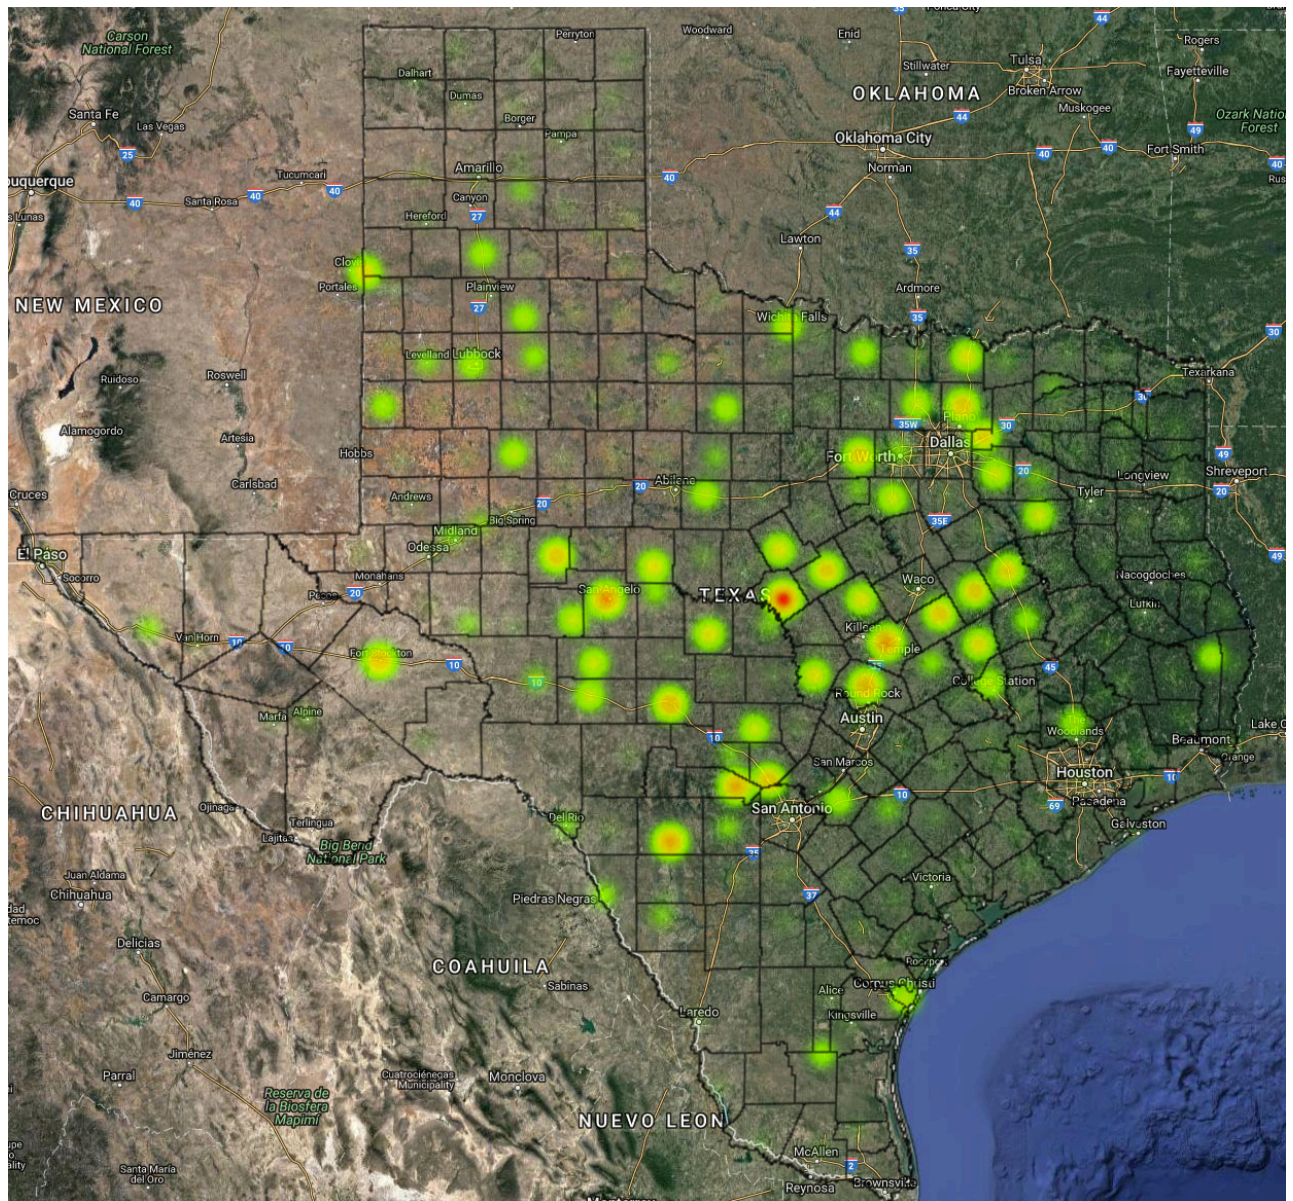

Texas enjoys the largest youth livestock program in the nation and is also unmatched in livestock project participation and support from donors. The Texas Livestock Project Participation and Financial Support Survey was sent out to county extension agents statewide to report the total youth participation (4-H and FFA combined) in livestock shows at the county level, along with the economic support to livestock project exhibitors. The heat maps below show the dispersion of Market and Breeding Lambs in Texas. The data collected is a combined estimate from the 2015 county-level livestock shows in Texas.

Heat Map 1: Market and Breeding Sheep Combined

Heat Map 2: Market Lambs

Heat Map 3: Breeding Sheep (Combine Rams and Ewes)
